

Amendment to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1-16 (canceled)

17. (new) An article comprising:

- (i) a continuous, opaque layer of metal;
- (ii) a polyurethane substrate on an outer surface of the layer of metal; and
- (iii) at least one component on an outer surface of the polyurethane substrate

opposite the layer of metal, wherein the at least one component comprises a printed message, a decorative pattern, a color layer, a clear coat protective layer, or a combination thereof and wherein at least part of said layer of metal is visible through said polyurethane substrate and said at least one component.

18. (new) The article of claim 17, wherein said metal is selected from tin, chromium, nickel, stainless steel, copper, aluminum, indium, gold, silver, or alloys thereof.

19. (new) The article of claim 17, wherein said metal is indium or an alloy thereof.

20. (new) The article of claim 17, wherein said metal is tin or an alloy thereof.

21. (new) The article of claim 17, wherein said polyurethane substrate includes a crosslinking agent..

22. (new) The article of claim 17, further comprising a primer layer on said layer of metal for improving adhesion to said layer of metal.

23. (new) The article of claim 17, wherein said metal is in direct contact with said polyurethane substrate.

24. (new) The article of claim 17, wherein said polyurethane substrate includes colorants for providing a colored or tinted appearance to said polyurethane substrate.

25. (new) The article of claim 17, further comprising a backing on a surface of the layer of metal opposite the polyurethane substrate, said backing comprising an attachment system, a reinforcement material, or a combination thereof.

26. (new) The article of claim 25, wherein the attachment system comprises an adhesive.

27. (new) An article comprising:

- (i) a continuous, opaque layer of metal;
- (ii) a polyurethane substrate on a surface of said layer of metal; and
- (iii) at least one backing on a surface of said layer of metal opposite said polyurethane substrate, said backing comprising an attachment system, a reinforcement material, or a combination thereof.

28. (new) The article of claim 27, wherein said attachment system comprises a pressure-sensitive adhesive foam tape.

29. (new) The article of claim 27, wherein said attachment system is an adhesive.

30. (new) The article of claim 28, wherein said metal is selected from the group consisting of tin, chromium, nickel, stainless steel, copper, aluminum, indium, gold, silver, and alloys thereof.

31. (new) The article of claim 27, wherein said polyurethane substrate is transparent such that the layer of metal is viewable through the polyurethane substrate.

32. (new) The article of claim 27, further comprising at least one component on an outer surface of the polyurethane substrate opposite the layer of metal, wherein the at least one component comprises a printed message, a decorative pattern, a color layer, a clear coat protective layer, or a combination thereof and wherein at least part of said layer of metal is visible through said polyurethane substrate and through said at least one component.

33. (new) The article of claim 32, wherein the at least one component comprises said clear coat protective layer.

34. (new) The article of claim 32, wherein the at least one component comprises said clear coat protective layer is an outer layer of the article.

35. (new) An article comprising:

- (i) a continuous, opaque layer of metal;
- (ii) a polyurethane substrate on an outer surface of the layer of metal;
- (iii) at least one component on an outer surface of the polyurethane substrate opposite the layer of metal, wherein the at least one component comprises a printed message, a decorative pattern, a color layer, a clear coat protective layer, or a combination thereof and wherein at least part of said layer of metal is visible through said polyurethane substrate and said at least one component; and
- (iv) at least one backing on a surface of said layer of metal opposite said polyurethane substrate, said backing comprising an attachment system, a reinforcement material, or a combination thereof.

36. (new) The article of claim 35 further comprising a base substrate.
